

ISLAM MD SIMUL (施慕)

Software & Java Developer | AI & NLP Enthusiast | Human-Machine Interaction | Entrepreneur

Email: 23320120006@stu.nsu.edu.cn | pedu491@163.com | www.simul49.com

Phone: +86-15680416508 (China) | +8801304634479 (WhatsApp) | QQ: 3943553604

Social Platforms: LinkedIn | GitHub | LeetCode | Facebook | WeChat: simul49

Address: D6 Building, Neusoft Avenue, Qingchengshan Town, Dujiangyan City, Chengdu, Sichuan Province, China. Zip code: 611844

PROFESSIONAL SUMMARY

Software Engineering student specializing in Software development, Artificial Intelligence, and Natural Language Processing (NLP). Proficient in Java, Spring Boot, Vue.js, Python, Django, MySQL, YOLO, data structures, and Algorithms, with practical experience in Mobile application development and Software engineering projects. Familiar with AI and machine learning frameworks and technologies, including PyTorch, TensorFlow, LangChain, Hugging Face, OpenCV, and Ollama, with the ability to apply AI technologies to real-world applications.

Possesses strong innovation, leadership, communication, and teamwork skills, with the ability to quickly learn new technologies and efficiently solve practical problems. Experienced in participating in and managing team projects, with solid project organization and coordination abilities.

Passionate about integrating artificial intelligence with software development to build intelligent and innovative software solutions that create value for businesses and users.

PROFESSIONAL EXPERIENCE

Renata Limited (Gazipur, Dhaka, Bangladesh) – IT Specialist and Team Leader **October 2022 – July 2023**

- Collaborated with engineers from China, Italy, and Egypt in cross-functional international teams, contributing to production management and technical support activities.
- Participated in the manufacturing process of high-value hormonal pharmaceutical products, ensuring the accuracy, stability, and reliability of equipment and production operations.
- Managed and trained two teams, providing guidance on software upgrades, equipment operation, and control system maintenance.
- Demonstrated strong leadership, cross-cultural communication, and problem-solving skills, with the ability to perform efficiently and deliver results in high-pressure environments.

IT Institute, Rajshahi, Bangladesh - Digital Marketing Specialist **May 2020 – May 2022**

- Participated in digital marketing campaigns and promotional activities across Facebook and Google platforms, including live-stream operations and performance analysis.
- Managed digital marketing initiatives, data collection, and analytical reporting to improve team productivity and operational efficiency.
- Developed strong analytical, teamwork, and creative problem-solving skills through collaborative projects and marketing campaigns.
- Demonstrated excellent learning agility and adaptability, quickly acquiring new technologies and applying them effectively in practical work environments.

PROJECTS

PEdu Tech, Rajshahi, Bangladesh - Software Development Team Member **November 2023 – February 2024**

- Developed and maintained web applications using Java Spring Boot and JavaScript, contributing to backend development and core system functionality implementation.
- Designed and implemented RESTful APIs while collaborating with frontend developers and team members on requirements analysis, system design, feature development, and software testing.
- Gained hands-on experience in enterprise-level web application development, strengthening software engineering practices, problem-solving abilities, and collaborative teamwork skills.

Software and IoT Club - Chengdu Neusoft University - Project Development Member **April 2024 – October 2024**

- Participated in innovation and IoT projects through the Software Innovation and IoT Clubs, contributing to the design and development of multiple applications.

- Collaborated with Chinese student teams to develop web applications using Java, Spring Boot, and MySQL.
- Contributed to system design, backend development, and database implementation, gaining practical experience in software engineering and collaborative development.

Battuta AI Travel Assistant - Sichuan International Student Innovation and Entrepreneurship Competition Project **October 2024 – November 2024**

- Independently participated in the Sichuan International Student Innovation and Entrepreneurship Competition, completing the project under faculty supervision.
- Proposed and developed an AI-powered travel assistant concept, leading project design, feature planning, and business model analysis.
- Designed an innovative solution to enhance travel experiences through AI-driven recommendations and intelligent travel services.

Neusoft BloodBank - Android Application and WeChat Mini Program Developer **March 2025 – August 2025**

- Independently designed, developed, and deployed the Neusoft BloodBank Android application and WeChat Mini Program, managing the entire development lifecycle from requirements analysis to deployment.
- Implemented core functionalities and data management using WeChat Cloud Development, gaining practical experience in the WeChat ecosystem, cloud services, and mobile application development.
- Enhanced system performance and user experience through continuous testing and optimization, earning outstanding academic evaluations and recognition as an excellent project.

FinPal – Smart Personal Finance Management Platform (Team Project) **September 2025 – January 2026**

- Developed a modern personal finance management platform using JavaScript and Vue.js, implementing expense tracking, budget management, and financial data visualization features.
- Contributed to system design, frontend development, and user interface optimization to enhance usability and user experience.
- Collaborated with team members on requirements analysis, feature development, and testing, strengthening frontend development and teamwork skills.

EcoHub AI – Intelligent Travel Assistant - Django Full-Stack Development Project **February 2026 – June 2026**

- Independently designed, developed, and optimized a real-time AI-powered travel web application using Python Django, Vue.js 3, and Tailwind CSS as a capstone project.
- Integrated Large Language Models (LLMs) and third-party APIs to provide intelligent travel recommendations, AI-powered assistance, and real-time travel information services.
- Led system architecture design, full-stack development, and feature optimization, gaining practical experience in AI application development and modern full-stack engineering.

AI Smart Home System - Object-Oriented Analysis and Design Course Project **February 2026 – June 2026**

- Independently designed and developed an AI-powered smart home system using Java, Spring Boot 3, MySQL, Vue.js 3, and Tailwind CSS as part of the Object-Oriented Analysis and Design course.
- Integrated Large Language Models (LLMs) and third-party APIs to enable intelligent device control, smart interactions, and real-time services.
- Designed the system architecture, implemented WebSocket-based real-time communication, and planned MQTT and ESP32 IoT integration, gaining practical experience in full-stack development, AI applications, and IoT systems.

Recent Projects

- AI Vibe and Roast – AI-powered interactive game and Douyin Mini Program featuring conversational AI and entertainment-based user interactions.
- Paradox AI – An intelligent Chinese history and culture assistant developed for the Douyin AI Innovation Competition, providing AI-driven educational and cultural experiences.

SKILLS

- Programming Languages & Frameworks: Java, Python, JavaScript, Spring Boot, Django, Vue.js 3, MySQL, HTML5, CSS3, Tailwind CSS
- Artificial Intelligence & Machine Learning: Large Language Models (LLMs), YOLO, PyTorch, TensorFlow, LangChain, Hugging Face, OpenCV, Ollama, CNN, RNN, Swarm Robotics

- AI Development & Intelligent Programming Tools: GitHub Copilot, OpenAI Codex, CodeBuddy, Google Gemini and Antigravity, SoloAgent , AI Agent Development, AI-Assisted Programming, AI Vibe Coding
- Development Tools: Git, GitHub, Visual Studio Code, IntelliJ IDEA, Android Studio, PyCharm, NetBeans, MySQL Workbench, Navicat, Figma, Axure, Canva, JMeter
- Platforms & Development Environments: WeChat and Douyin(Tiktok) Mini Program Development, Linux, RESTful APIs, WebSocket, MQTT
- Office & Data Analysis: Microsoft Office (Word, Excel, PowerPoint), Google Analytics, Data Analysis and Reporting
- Professional Skills: Team Collaboration and Leadership, Project Management, Cross-Cultural Communication, Problem Solving, Rapid Learning, Innovation and Creativity

EDUCATION

Bachelor of Software Engineering

September 2023 – June 2027 (Expected)

Chengdu Neusoft University- Chengdu, Sichuan, China

- **Fundamental Courses:** Data Structures, Database Systems, Operating Systems, Computer Networks, Software Engineering, Software Architecture, Software Testing, Java Programming, Object-Oriented Programming (Java), Discrete Mathematics, Linear Algebra, Python Application Development, and Introduction to Artificial Intelligence.
- **Core Courses:** Object-Oriented Analysis and Design, Software Testing, Frontend and Backend Framework Development, Microservices Development, Human–Computer Interaction, HTML5 Application Development, Mobile Application Development, Web Development, and WeChat Mini Program Development.
- **Program Highlights:** Participated in a project-driven curriculum emphasizing the full software engineering lifecycle, including requirements analysis, system design, implementation, testing, and real-world software development practices.
- **Technical Specializations:** Developed practical expertise in Java backend development, full-stack web development, mobile application development, microservices architecture, and AI application development.

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Bengali (Native), Hindi & Urdu (Conversational), Chinese (Basic), Arabic (Elementary)
- **Certifications:**
 - 1.Certified Computer Database, Shuvo Computer Training Center, Bangladesh (2019)
 - 2.Digital Marketing Certification, 10 Minute School, Bangladesh (2020)
 - 3.IT Specialist & Team Leader Recognition, Renata Limited, Gazipur, Dhaka, Bangladesh
 - 4.8th RUSC National Science Festival, University of Rajshahi (2024–2025) – Android Application Innovation and AI Business Model Project
 - 5.Outstanding Student Leader Certificate, Neusoft Youth Club, Chengdu Neusoft University (2025)
- **Awards / Activities:**
 - 1.Bangladesh ScoutsMember (2012, 2017, 2019)
 - 2.Sichuan International Student Innovation and Entrepreneurship Competition – Battuta AI Travel Assistant Project Participant (2024)
 - 3.International Volunteer Member, Foreign Affairs Office of Dujiangyan City, China (2024)
 - 4.Best Ambassador & Innovation Contributor, ICT Olympiad Bangladesh (2024–Present)
 - 5.Best Ambassador & Robotics Advisor, Robo Tech Valley (2025–Present)

INTERESTS & HOBBIES

- Reading: History, Philosophy, Geopolitics, and Arab Civilization
- Traveling: Exploring new cultures and experiences
- Sports: Badminton and other recreational sports
- Outdoor Activities: Fishing, Gardening, and Nature Exploration
- Personal Growth: Mindset development, **Entrepreneurship**, and creating opportunities to **Earn** while helping others

THESIS & FINAL PROJECT

- **Project Title:** *Autonomous Multi-Agent Orchestration for Self-Healing Distributed Systems*
- **Research Area:** Artificial Intelligence, Distributed Systems, and Multi-Agent Systems (AI Agents & Distributed Systems)
 1. Investigates how multiple AI agents can collaboratively detect system vulnerabilities, automatically generate repair patches, and perform real-time deployment and system recovery without human intervention.
 2. Aims to develop an intelligent distributed system capable of automated fault detection, self-repair, and continuous deployment to improve system stability, autonomy, and reliability.
 3. Focuses on AI agents, multi-agent collaboration, LLM applications, distributed system architecture, AIOps, and real-time system deployment technologies.
- **Technical Focus Areas:** AI Agents, Multi-Agent Systems, Large Language Models (LLMs), Distributed Systems, AIOps, Autonomous System Recovery, Real-Time Deployment, Intelligent System Orchestration
